Data Structures 024 and 025: Patient Date of Birth and Patient Identification Number, Location Code
Table RT018

The following reference table RT018 contains the location codes that identify where the occurrence of the patient information is held. The values on the table are for use in Patient Date of Birth (Data Structure 024) and Patient Identification Number (Data Structure 025). For any questions or requests to add additional locations to the table, please contact the ICCBBA office.

Value	Location
00	Not used
01	Wrist band
02	Order form
03	Sample Tube
04	Working list/Lab list/form
05	Test report
06	Delivery note/issue documentation
07	Intended recipient label (attached to container)
08	Label affixed to product
09	Identity card
10	Clinical or progress notes
11-79	Reserved
80-99	For local or national use

Note: These location codes may also be used with GS1.
