

ISBT 128 Standard Terminology for Medical Products of Human Origin –  
Version Control Sheet 2020

Version 7.45 December 11, 2020			
	Section	Change	Rationale
1.	16	Removed the following Technical Bulletins: <ul style="list-style-type: none"><li>Revised Cardiovascular Tissue Terminology (TB-009)</li><li>Revised Cellular Therapy Terminology (TB-010)</li></ul>	These specific Technical Bulletins have been retired.

Version 7.44 November 13, 2020			
	Section	Change	Rationale
1.	4.1.3	Added New Classes: <ul style="list-style-type: none"><li>BONE, FIBERS/POWDER</li><li>BONE, GROUND/POWDER</li></ul>	Requested by the US
2.	4.1.5	Added New Class: <ul style="list-style-type: none"><li>BIRTH TISSUES</li></ul>	Requested by the US

Version 7.43 November 05, 2020			
	Section	Change	Rationale
1.	2.3.2.1	Updated the definition of the Infection Attribute Group (section 2.3.2.1)  Old definition: <ul style="list-style-type: none"><li>Provides information about specific disease history of the donor. This attribute group is to be used with the class CONVALESCENT PLASMA.</li></ul> New definition: <ul style="list-style-type: none"><li>Provides information about specific disease history of the donor. The history information may contain information to reflect the quantity of antibody present. This attribute group is to be used with the class CONVALESCENT PLASMA.</li></ul>	To accommodate the new attributes for high and low titer COVID-19.

ISBT 128 Standard Terminology for Medical Products of Human Origin –  
Version Control Sheet 2020

Version 7.43 November 05, 2020			
	Section	Change	Rationale
2.	2.3.2.2.16	Added New Attributes: <ul style="list-style-type: none"><li>• COVID-19 high titer</li><li>• COVID-19 low titer</li></ul>	Requested by the US
3.	3.2.2.2.2	Updated the definition of the Attribute pulsed  Old definition: <ul style="list-style-type: none"><li>• The loading of antigens (such as peptides, tumor antigens, etc.) on dendritic cells to increase the specificity of the immunotherapy.</li></ul> New definition: <ul style="list-style-type: none"><li>• The loading of antigens (such as peptides, tumor antigens, etc.) on immune cells, such as dendritic cells or T-cells, to increase the specificity of the immunotherapy.</li></ul>	Requested by CTCLAG

Version 7.42 October 02, 2020			
	Section	Change	Rationale
1.	2.3.2.2.13	Added New Attributes: <ul style="list-style-type: none"><li>• Bacterial monitoring <math>\geq 24h</math></li><li>• Bacterial monitoring <math>\geq 36h</math></li></ul>	Requested by the US

Version 7.41 September 08, 2020			
	Section	Change	Rationale
1.	3.1.2	Moved Classes: <ul style="list-style-type: none"><li>• MNC, UMBILICAL CORD TISSUE</li><li>• NC, ADIPOSE TISSUE</li><li>• NC, UMBILICAL CORD VESSEL</li></ul> from Subcategory 1 to Subcategory 2	Requested by CTCLAG
2.	3.1.3	Added New Abbreviation <ul style="list-style-type: none"><li>• MNC(WB)</li></ul>	Requested by China

ISBT 128 Standard Terminology for Medical Products of Human Origin –  
Version Control Sheet 2020

Version 7.41 September 08, 2020			
	Section	Change	Rationale
3.	3.2.2.2.12	Added New Attribute: <ul style="list-style-type: none"><li>• CD4+CD8 enriched</li></ul>	Requested by the US
4.	4.1.2	Added New Class <ul style="list-style-type: none"><li>• TENDON, PALMARIS LONGUS</li></ul>	Requested by the US
5.	4.3.2.2.2	Added New Attribute: <ul style="list-style-type: none"><li>• Cryomilled</li></ul>	Requested by Spain

Version 7.40 August 03, 2020			
	Section	Change	Rationale
1.	3.1.2	Added New Classes: <ul style="list-style-type: none"><li>• NC, PLACENTA</li><li>• NC, UMBILICAL CORD</li></ul>	Requested by China
2.	8.2.1.4	Added Attribute: <ul style="list-style-type: none"><li>• PAS-F</li></ul>	Requested by the US  This attribute was added in version 7.39. This addition needed to be reflected in the Human Milk section since Topical products share attributes

Version 7.39 July 06, 2020			
	Section	Change	Rationale
1.	3.1.1	Revised Subcategory definitions:  <b>Subcategory 1</b> From: “At collection the product code will describe the composition of the cell therapy products. It can be HPC, NC, or MNC. These products can be collected for direct infusion without further manipulation. HPCs may be further manipulated, but would retain the class name HPC if they are used	Requested by CTCLAG

Version 7.39 July 06, 2020			
	Section	Change	Rationale
		<p>as a source of hematopoietic progenitor cells. If these products undergo modification such as cryopreservation and thawing, the class will not change but the modification is added into the product description as an attribute.”</p> <p>To: “At collection the product code will describe the composition of the cell therapy products. It can be HPC, NC, or MNC. These products may be collected for direct infusion without further manipulation, or may be further processed into other cellular therapy classes. If they are HPCs they would retain the class name if they are used as a source of hematopoietic progenitor cells. If these products undergo modification such as cryopreservation and thawing, the class will not change but the modification is added into the product description as an attribute.”</p>	
2.	3.1.1	<p>Revised Subcategory definitions:</p> <p><b>Subcategory 2</b> From: “After enumeration or manufacture/processing of the collected products, the product may be identified by the target cell population. These class names are based on desired cell population thought to present in the product.”</p> <p>To: “After enumeration or manufacture/processing of the collected products, the product is identified by the target cell population.”</p>	Requested by CTCLAG
3.	3.1.2	Moved Class MNC, CORD BLOOD from Subcategory 1 to Subcategory 2	Requested by CTCLAG

ISBT 128 Standard Terminology for Medical Products of Human Origin –  
Version Control Sheet 2020

Version 7.39 July 06, 2020			
	Section	Change	Rationale
4.	9.2.1.4	Added New Attribute: <ul style="list-style-type: none"><li>• PAS-F</li></ul>	Requested by the US

Version 7.38 June 5, 2020			
	Section	Change	Rationale
1.	2.1.1	Added New Class: <ul style="list-style-type: none"><li>• POOLED CONVALESCENT PLASMA</li></ul>	Requested by Portugal

Version 7.37 June 1, 2020			
	Section	Change	Rationale
1.	4.1.3	Added New Class: <ul style="list-style-type: none"><li>• HIP JOINT</li></ul>	Requested by Spain

Version 7.36 May 1, 2020			
	Section	Change	Rationale
1.	2.1.1	Added New Class: <ul style="list-style-type: none"><li>• POOLED LEUKOCYTES</li></ul>	Requested by Australia
2.	2.3.2.2.15	Added New Attribute: <ul style="list-style-type: none"><li>• SARS-Cov-2</li></ul>	Requested by Australia
3.	16	Documents to Other References section: <ul style="list-style-type: none"><li>• Revised Tissues Terminology Products That Contain Bone and Soft Tissue Combinations (TB-013)</li><li>• Revised Reproductive Terminology (TB-014)</li></ul>	Requested by ICCBBA Documents provide additional guidance to users regarding terminology changes.

Version 7.35 April 1, 2020			
	Section	Change	Rationale
1.	2.3.2.2.4	Added New Attributes: <ul style="list-style-type: none"><li>• Residual Leukocyte Content Nationally Defined</li></ul>	Requested by Ukraine

ISBT 128 Standard Terminology for Medical Products of Human Origin –  
Version Control Sheet 2020

Version 7.35 April 1, 2020			
	Section	Change	Rationale
2.	3.1.2	Revised Class definitions: <ul style="list-style-type: none"><li>• iPSC, SKIN</li><li>• iPSC, WHOLE BLOOD</li></ul>	The definitions updated to include full name “induced pluripotent stem (iPS)”  Requested by ICCBBA for consistency amongst iPSC Classes.
3.	4.1.6	Renamed Classes and revised definitions: <ul style="list-style-type: none"><li>• Renamed “TENDON, PATELLAR WITH PROXIMAL TIBIA” to “TIBIA, PROXIMAL WITH PATELLAR TENDON</li><li>• Renamed “TENDON, PATELLAR WITH TIBIA AND MENISCI” to “TIBIA AND MENISCI WITH PATELLAR TENDON”</li><li>• Renamed “TENDON, PATELLAR WITH WHOLE TIBIA AND PATELLAR BONE BLOCK” to “TIBIA WITH PATELLAR TENDON AND PATELLAR BONE BLOCK”</li></ul>	These classes were removed from section 4.1.2 and were moved into section 4.1.6 *  Requested by ITTAG
4.	4.1.6	Added New Classes: <ul style="list-style-type: none"><li>• RADIUS, WITH BICEPS TENDON</li><li>• ULNA, WITH TRICEPS TENDON</li></ul>	Requested by ITTAG
5.	5.2.1.11	Added New Attribute: <ul style="list-style-type: none"><li>• Meibum</li></ul>	Requested by the US
6.	9.2.1.1	Added New Attribute: <ul style="list-style-type: none"><li>• Frozen</li></ul>	Requested by Australia
7.	14.3.1	Moved Classes to Retired Section: <ul style="list-style-type: none"><li>• TENDON, BICEPS WITH RADIUS</li><li>• TENDON, TRICEPS WITH ULNA</li></ul>	These classes were removed from section 4.1.2 and were moved into retired 14.3.1  Requested by ITTAG

**\*\*[TB-013 - Revised Tissues Terminology Products That Contain Bone and Soft Tissue Combinations](#) v1.0.0 – PDF.**

Provides guidance on the changes made to the Bone and Soft Tissue Terminology in version 7.35.0 of the ISBT 128 Product Description Code Database and 7.35 of the ISBT 128 Standard Terminology for Medical Products of Human Origin (ST-002).

<b>Version 7.34 March 03, 2020</b>			
	<b>Section</b>	<b>Change</b>	<b>Rationale</b>
1.	2.3.2.2.16	Added New Attribute: <ul style="list-style-type: none"><li>• COVID-19</li></ul>	Requested by Singapore

<b>Version 7.33 February 26, 2020</b>			
	<b>Section</b>	<b>Change</b>	<b>Rationale</b>
1.	2.3.2.2.11	Added New Attribute: <ul style="list-style-type: none"><li>• Pathogen reduced: Method NS</li></ul>	Requested by the UK
2.	3.1.2	Added New Class: <ul style="list-style-type: none"><li>• DUAL CELL FUSION</li></ul>	Requested by the US
3.	4.3.2.2.11	Capitalized the “M” in method for attribute: <ul style="list-style-type: none"><li>• Pathogen reduced: Method NS</li></ul>	For consistency throughout Standard Terminology
4.	5.2.1.6	Capitalized the “M” in method for attribute: <ul style="list-style-type: none"><li>• Pathogen reduced: Method NS</li></ul>	For consistency throughout Standard Terminology

<b>Version 7.32 January 03, 2020</b>			
	<b>Section</b>	<b>Change</b>	<b>Rationale</b>
1.	11.1	Updated Class definitions: <ul style="list-style-type: none"><li>• EMBRYO</li><li>• OOCYTE</li><li>• SPERM</li></ul>	Requested by ARTTAG
2.	11.1	Added New Class: <ul style="list-style-type: none"><li>• ZYGOTE</li></ul>	Requested by ARTTAG
3.	11.2.1.2	Updated Attribute definition: <ul style="list-style-type: none"><li>• Aspirated testicular</li></ul>	Requested by ARTTAG

ISBT 128 Standard Terminology for Medical Products of Human Origin –  
Version Control Sheet 2020

Version 7.32 January 03, 2020			
	Section	Change	Rationale
4.	11.2.1.3	Retired Attribute: <ul style="list-style-type: none"><li>• MI</li></ul>	Requested by ARTTAG
5.	11.2.1.3	Renamed Attributes and revised definitions: <ul style="list-style-type: none"><li>• Renamed “GV” to ‘Immature’.</li><li>• Renamed “MII” to “Mature”.</li></ul>	Requested by ARTTAG
6.	11.2.1.3	Added New Attribute: <ul style="list-style-type: none"><li>• Maturing</li></ul>	Requested by ARTTAG
7.	11.2.1.4	Retired Attribute: <ul style="list-style-type: none"><li>• Fertilized oocyte</li></ul>	Requested by ARTTAG
8.	11.2.1.4	Updated Attribute definitions: <ul style="list-style-type: none"><li>• Blastocyst</li><li>• Cleavage stage</li><li>• Morula</li></ul>	Requested by ARTTAG
9.	11.2.1.6	Updated Attribute definition: <ul style="list-style-type: none"><li>• Washed</li></ul>	Requested by ARTTAG
10.	11.2.1.6	Added New Attribute: <ul style="list-style-type: none"><li>• Prepared</li></ul>	Requested by ARTTAG
11.	14.7.2.5	Added Retired Attribute Group and terminology <ul style="list-style-type: none"><li>• MI</li></ul>	Requested by ARTTAG
12.	14.7.2.6	Added Retired Attribute Group and terminology <ul style="list-style-type: none"><li>• Fertilized oocyte</li></ul>	Requested by ARTTAG
